

Guard Point Pro Software

Flexible Access Control and Alarm & Management Software

Key Features

- CCTV integration with Dedicated Micros
- Multiple workstations
- Secondary back up communication bus
- Global functionality
- ID card production
- Alarm control and graphical maps
- Guard tour
- Parking control
- Powerful report wizard
- Multi company database
- OPC server integration
- SQL database option
- Lift control
- Communication with 3rd party databases

Guardpoint Pro Software

Flexible Access Control and Alarm & Management Software

GuardPoint Pro is sophisticated, yet user friendly access control and alarm management software that centralises security requirements within all types of installations, irrespective of complexity.

It is packed full of high-end features, yet is simple to commission and extremely end-user friendly, its flexibility makes it ideal for every size of installation. Large installations can rely on the power of MS SQL Server 2000 to monitor tens of thousands of Cardholders, hundreds of Controllers, Multiple Workstations, Multiple Companies and Multiple Site applications.

Large system Capacity - Large installations can rely on the power of MS SQL Server 2000 to monitor tens of thousands of Cardholders, hundreds of Controllers, Multiple Workstations, Multiple Companies and Multiple Site applications.

Personalised Report Wizard - GuardPoint Pro incorporates a user friendly and powerful report wizard for the generation, update and export of personalized reports in widely used formats.

Biometric Integration - Sensor's range of Bio-Prox, Bio-Pass, Bio-Flex and Bio-Smart fingerprint readers provide unrivalled biometrics integration where one software interface is used for the full management and one hardware interface for both biometrics readers and the access controllers.

CCTV Integration - GuardPoint Pro offers powerful and simple CCTV integration with DVR's, from dedicated micros and others. Access transactions and alarms can trigger a live display and record on the DVR, and customers can fully manage the camera from any GuardPoint Pro workstation.

Powerful Actions, Process and Global Reflexes - Several actions can be pre-defined in the system and then grouped into a process which can be automatically triggered in case of an alarm, access denied, or scheduler taking place. This feature offers the user unchallenged flexibility and power.

Redundant Communication - The GuardPoint Pro system can be configured with powerful IC-2000/4000 controllers to work in dual bus mode, where the secondary bus can be used as back-up in case of primary failure or as a dedicated bus for alarm management in large scale applications, offering an ultimate level of reliability and security in real time.

Alarm Management - Alarms reported in the system immediately show in red, with corresponding instructions, flashing icons and audio, and will continue whilst they await acknowledgment and confirmation.

Biometric Management - Template management (enrolment, distribution) and reader configuration can easily be defined by GuardPoint Pro.

Report Wizard - Report configuration screen showing the full flexibility of the reporting tool by simply selecting the required fields to be included in the report.

Guardpoint Pro Software

Flexible Access Control and Alarm & Management Software

System Specification

Maximum number of controllers	Unlimited (TCP/IP) 3,168 (RS 232/485)
Number of loops per server	99
Number of site codes per system	Unlimited
Number of Controllers per loop	32
Number of readers per loop	64 (IC-1000) 128 (IC-2000) 128 (IC-4000)
Door Lock outputs per loop	64 (IC-1000) 128 (IC-2000) 128 (IC-4000)
Operator Workstations	8 (MS Access) 20 (SQL)
Number of cards	Unlimited (Database) 10,000 (IC-1000) 40,000 (IC-2000) 40,000 (IC-4000)
Lift Control	Yes
Access levels	Unlimited
Access level group	Unlimited
Programmable alarms	2,000 +
Compatible controllers	IC1000/IC2000/IC4000/IC1604
Compatible operating system	Windows 98/2000/ME/NT/XP
Network compatibility	Ethernet and Novell networks
Access level	Unlimited
Access level groups	Unlimited
Schedules	99 Daily (Four time zones) 32 Weekly 40 Holidays
System operator passwords	Unlimited
Operator Security levels	Unlimited
Language	English/French/Chinese/Korean Hungarian/Spanish/Polish Arabic/Portuguese/Russian
Global Antipas back	Yes
Global Antipas back without PC	Yes, per loop
Area present list	Yes
Global reflex	Yes
Global reflex without PC	Yes, per loop
Visitor Management	Yes

System Specification

Integrated badging	Yes
Customised labels	4
Customised fields	Un-limited (Text) (Date) (Tick Box) (Number)
Importable graphical version	Yes JPEG/AutoCAD*
Import external icons	Yes
Automatic action and process	Yes
Alarm redundant BUS	Yes
Automatic counters	Yes
Parking lot control group	Unlimited
Parking user	Unlimited
Parking zone	Unlimited
Guard tour	Yes
Number of guard tours	Unlimited
Number of guard tour check points	Unlimited
Export report format	RTF/PDF/HTML/XLS/TIF/Text
Report template design	Yes
Automatic report generation	Yes
Roll call report	Yes
Picture verification	Yes
Live video verification	Yes
Access level exceptions	Unlimited
Schedule access groups	Unlimited
Escorting	Yes
Automatic event scheduler	Yes
Operator response	Yes
Dynamic real time graphics	Yes
Virtual alarm management	Yes
Number of alarm zones	Unlimited
Alarm authorisation level	3
Time and attendance report	Yes
Time and attendance advanced report	No
Manual Modification to T&A data	Yes
Pre defined reports	Yes
Event message filter	Yes

Guard Point Pro Software

Flexible Access Control and Alarm & Management Software

Ordering Information

GPP/16	GuardPoint Pro access control software 16 readers, 2,000 users
GPP/16-ACM	GuardPoint Pro access control software 16 readers, 2,000 users Alarm control & Graphics module included
GPP/64	GuardPoint Pro access control software 64 readers, 5,000 users
GPP/128	GuardPoint Pro access control software 128 readers, 10,000 users
GPP/256	GuardPoint Pro access control software 256 readers, 40,000 users
BDG-GPP	ID card badge production - Produce ID cards from within GuardPoint Pro
GPP-WS	Additional Workstation Licence - Manage GuardPoint Pro from multiple PC's
ACM-GPP	Alarm Control and Graphics - Import graphical maps and manage interactive system alarms
PCM-GPP	Parking Control - Manage car park spaces according to user and company privilege
LCM-GPP	Lift Control - Manage access to floors within the building
GT-GPP	Guard Tour - Monitors security guard patrol activity
MC-GPP	Multi Company Database - Use one GuardPoint Pro software for multi tenanted buildings whilst allowing each company to manage their own system
CCTV-GPP	CCTV integration module for DM (Dedicate Micros) digital recorders DV-IP, EC04, DS2 and BX2 - Integrated live CCTV display and recordings within GuardPoint Pro
OPC-GPPOPC	Server Interface - Integrate into supervision software such as SCADA or BMS applications
SQL-GPP SQL	Database for GuardPoint Pro - A powerful alternative to MS Access for larger installations
